

Get valid and reliable early literacy data in minutes.

Star Early Literacy is a computer-adaptive assessment of early literacy skills for students in years 1-4. The assessment tracks student development in seven key domains:

- General Readiness
- Graphophonemic Knowledge
- Phonemic Awareness
- Phonics
- Comprehension
- Structural Analysis
- Vocabulary

It also assesses students' early numeracy skills.

Star Early Literacy uses sophisticated item calibration and psychometrics to adjust dynamically to each student's unique responses. You can administer the test at any point during the year and as often as results are needed.

Star Early Literacy assessments are:

Fast. You can screen an entire class in about 10 minutes to identify students who need help to reach benchmarks.

Test items incorporate text, graphics, and audio to assess skills in the most straightforward manner possible.

Actionable. You receive reports as soon as students finish testing. Screening, benchmarking, progress-monitoring, and growth reports provide informed insight into students' strengths and needs.

You can also group students by proficiency level to better provide focused instruction and intervention.

Immediate feedback to inform instruction.

Star Early Literacy gives you immediate feedback on your students' progress. This helps you plan instruction and address skill gaps.

Diagnose learning needs: Identify skills students have mastered and skills that require further attention.

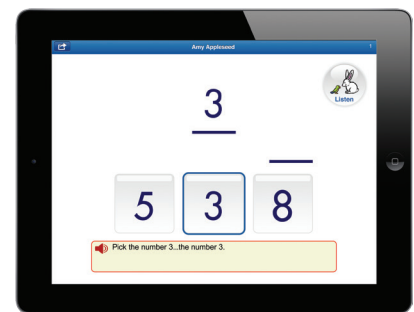

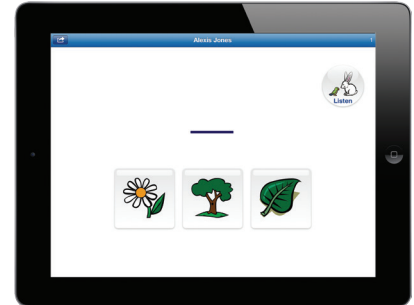

Assess early literacy and numeracy: Accurately assess key literacy and numeracy skills students need for future success.

Generate reliable data on every student: Screening and progress-monitoring data make it easy for you to set priorities.

Improve communication with parents: Parent reports help you explain test results and describe what students need for optimal reading growth.

Star Early Literacy complements our Literacy Package, which includes:

- **Star Reading**, which assesses the higher-order comprehension skills of independent readers.
- **Accelerated Reader**, which helps you provide students with independent reading practice at just the right level to facilitate growth.

Test items incorporate text, graphics, and audio to assess skills.
