

Student Progress View in myON

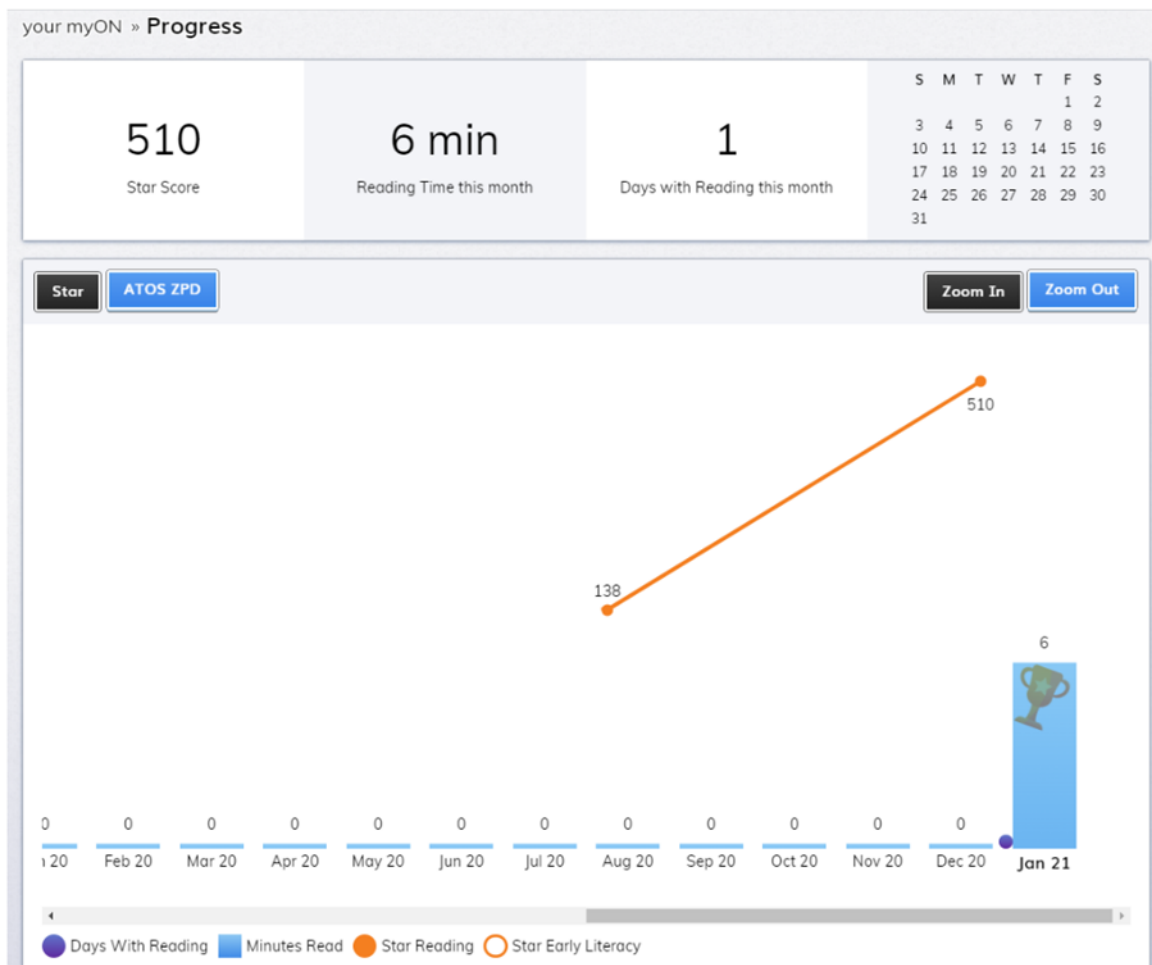

With new updates to myON, once students have linked their Star Reading account and can see their Star scores on their myON dashboard, they can select **See More** to see their previous Star Reading scores, the number of days with reading and the number of minutes read.

They can use the buttons in the top left corner of the graph to choose whether to see the Star Scaled Scores or ATOS ZPDs from Star tests depending on the settings the administrator has applied.

If the student has only taken either Star Early Literacy tests or Star Reading tests, they will see those scores. If they have taken both Star Reading and Star Early Literacy tests, they will see just the Star Reading scores.

When they select to view Star scores, Star Early literacy scores will have empty circles  and Star Reading and myON placement scores will have solid orange circles  so they can distinguish between the two.

As students take more tests, the information will be updated the next day. You can see which students have linked their Star data and their Star scores on the myON with Star Report.

Note: Students who have taken only Star Early Literacy assessments and whose Scaled Score has been lower than 383 will not see their Star scores in myON.
